PROFILE

I'm a junior Laravel developer with a degree in computer engineering and hands-on freelance experience. My passion for technology drives me to learn quickly and work hard. I enjoy solving complex problems and turning them into practical solutions. Even though I don't too much experience, I've worked on many projects independently and with teams. I'm excited about new challenges and eager to apply my skills in a collaborative environment. My goal is to contribute effectively to projects and grow as a developer.

EDUCATION

Bachelor in Computer Engineering

2019 – 2024 | Cairo, Egypt

Modern Academy For Engineering And Technology 

GPA: 3.41 (Ranked 4th in Cohort)

Graduation Project: Grade A+

SKILLS

Backend Skills: Laravel | PHP | MySQL | OOP | Filament | Livewire | API

Frontend Skills: HTML | CSS | JavaScript | Bootstrap | Tailwind | Saas | JQuery | Ajax

- Excelled in managing end-to-end project development, from initial concept to deployment, ensuring high client satisfaction.
- Demonstrated strong problem-solving skills and effective communication, delivering results that consistently exceeded client expectations.

PROJECTS

Multi-Vendor Ecommerce API [↗](#)

Sep 2024

The Laravel Multi-Vendor eCommerce API is a robust platform for managing multi-vendor eCommerce operations. It features secure OAuth JWT authentication, Google OAuth integration, and Paymob for payment processing. Vendors can easily manage products, orders, and payments, while customers enjoy seamless browsing, ordering, and secure checkout with OTP verification. The API supports multi-role access, multi-language functionality, and caching for optimized performance. Fully documented with Swagger, it provides a flexible, scalable solution for modern eCommerce platforms.

• Technologies Used: *Laravel, API, MYSQL, Passport, Swagger, Postman*

Brain Tumor Detection (BTD) [↗](#)

Aug 2024

BTD is an advanced web application designed to revolutionize brain tumor detection and management. Featuring multi-authentication capabilities, it ensures secure user access with options for login, registration, password management, and email verification. Administrators have robust control, overseeing hospitals, doctors, tumor data, and treatment plans. Users can effortlessly schedule appointments and generate comprehensive reports. The platform also offers seamless clinic and schedule management for doctors, optimizing their workflows. At its core, BTD leverages cutting-edge AI and deep learning models to accurately detect and recognize brain tumors from medical images, enhancing diagnostic precision and efficiency.

• Technologies Used: *Laravel, Livewire, Mysql, HTML, CSS, JavaScript, JQuery, Python, Flask, Opencv.*

KASHIER [↗](#)

Jul 2024

Cashier is a comprehensive web-based application designed to manage employee authentication and billing within an organizational environment. The core functionality of Cashier revolves around providing a smooth and efficient workflow for employees and financial processes.

• Technologies Used: *Laravel, Livewire, Docker, Mysql, HTML, CSS, JavaScript, JQuery, Bootstrap.*

Content Creator [↗](#)

Nov 2023

Content Creator is a website portfolio for a content-creator company. The company provides several services with a greater portfolio for these services. The website contains portfolio and admin dashboard for controlling this portfolio. The Website is also multilingual [Arabic, English].

• Technologies Used: *Laravel, Mysql, HTML, CSS, JavaScript, JQuery, Bootstrap.*

Book Store and Admin Dashboard [↗](#)

Jun 2023

It's an online book store and its employee dashboard for managing the store dynamically, with full representation of the selling process and controlling the website.

• Technologies Used: *PHP, Mysql, HTML, CSS, JavaScript, Bootstrap, Sass.*
